

21 March 1975

MEMORANDUM TO: C/BSD  
THRU : DC/BSD  
SUBJECT : Store Theft

1. After hours on the 20th of March, 1975, a routine stock straightening was made of the sale merchandise located on the shelf next to the record department. At that time, it was determined that we had two (2) KODAK Pocket Instamatic Cameras, Model A50 on the shelf. The determination was proved as to the daily posting of the sale item sheet posted on the wall inside the entrance to the store. The value of these cameras is: \$69.64, each. It was discovered this morning (21 March 1975) after opening the store at 1000 hours one of the two cameras was missing.

2. A call was made to the accounting department to ascertain the correct number of cameras on hand. That number was supposed to be six (6). A count was then made and determined that we only have five (5) on hand. It is supposed then, that one (1) KODAK Pocket Instamatic Camera, Model A50, valued at \$69.64 has been stolen from the sale shelf area on this date.

3. A copy of this memorandum will be forwarded to the accounting department for adjustments to the control sheets for inventory purposes. A copy will also be sent the Security, ATTN: [redacted] as per their instructions.
